PROFESSIONAL SUMMARY

Aspiring DevOps professional with a B.E. in Computer Science and 1+ year of experience as a Technical Support Analyst in an enterprise IT environment on a Deloitte engagement. Hands-on with AWS, Terraform, Ansible, Docker, Kubernetes, Helm, Argo CD, GitHub Actions, and Linux. Strong background in incident management, troubleshooting, and root cause analysis in SLA-driven environments, with project experience in building CI/CD pipelines and automating infrastructure and deployments. Seeking a DevOps Engineer role.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, ECS, EKS, S3, IAM, VPC, Route 53, RDS, Lambda, CloudWatch, CloudFront, Auto Scaling)
CI/CD & Version Control: Jenkins, GitHub Actions, CI/CD Pipelines, Git, GitHub
Containers & Orchestration: Docker, Docker Compose, Kubernetes, Containerization
Infrastructure as Code & Configuration Management: Terraform, Ansible, Infrastructure as Code (IaC)
Scripting & Programming: Bash, Shell Scripting, Python, YAML, SQL (MySQL)
Monitoring & Operations: AWS CloudWatch, Monitoring, Incident Management, Root Cause Analysis, Troubleshooting, Log Analysis, SLA Management
Operating Systems: Linux, Windows, macOS
Networking & Enterprise IT: TCP/IP, DNS, DHCP, Subnetting, Routing and Switching, Active Directory, CCNA

PROFESSIONAL EXPERIENCE

Technical Support Analyst **Aug 2025 – Present**
Source One Management Services Pvt. Ltd. (Contract, deployed to Deloitte)

- Resolved hardware, software, network, access, and endpoint incidents across Windows, macOS, and Linux in an enterprise environment while consistently meeting SLA targets.
- Performed log analysis, troubleshooting, and root cause analysis (RCA); documented findings and escalated complex incidents per defined support procedures.
- Administered Active Directory user accounts, permissions, and access control, including password resets and account provisioning.
- Authored runbooks and knowledge-base documentation for recurring issues, improving troubleshooting consistency and reducing repeat tickets.

DEVOPS PROJECTS

End-to-End DevOps for a Golang Web Application | Docker, Kubernetes, GitHub Actions, Argo CD, Helm

- Containerized a Golang web application using a multi-stage Docker build, created Kubernetes manifests, and set up a Kubernetes cluster to run it.
- Implemented CI with GitHub Actions and CD with Argo CD, created Helm charts for multiple environments, configured an Ingress controller and DNS mapping for the domain, and demonstrated the complete CI/CD flow end to end.

Infrastructure Creation and Configuration on AWS | Terraform, Ansible, AWS

- Used Terraform to create AWS infrastructure (VPC, subnets, EC2 servers, security groups, and load balancer) as repeatable code.
- Used Ansible playbooks to configure the Linux servers and deploy the application automatically.

ACADEMIC PROJECT

SmartDB: Chatbot and Voice-Interactive Database Application

- Developed a chatbot using the OpenAI API to answer user queries in natural language.
- Implemented voice interaction to recognize spoken commands and generate and execute MySQL queries.
- Technologies: Python, Flask, MySQL, OpenAI API, SpeechRecognition, pyttsx3.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering **Aug 2020 – May 2024**
Anna University Regional Campus, Madurai | CGPA: 8.5/10

Higher Secondary Education (HSE) **Jun 2019 – Mar 2020**
Kongu Matric Hr Sec School, Morappur | 85.16%

CERTIFICATIONS & TRAINING

- AWS Certified Cloud Practitioner Course (Udemy) | CCNA (Cisco Certified Network Associate) Course
